EXPERIENCE

Salesforce Consultant and Developer **Oct 2025 – Present**

EI-TECHNOLOGIES MENA

- Designed and implemented Salesforce solutions aligned with client-specific business workflows, including custom objects, fields, validation rules, and Lightning components.
- Executed end-to-end data migration activities using Salesforce Data Loader and APIs, covering environment setup, sandbox testing, and production deployment.
- Built integrations with third-party systems using REST/SOAP APIs, ensuring data integrity, security, and compliance with enterprise data models.

Technical Consultant BC – Microsoft Business Central Internship **Jun 2025 – Aug 2025**

Exquitech (Digital Solutions & Consulting) - Lebanon

- Developed AL extensions, role centers, and reporting packages for client-specific workflows.
- Executed data migration scripts, environment setup, sandbox testing, and production rollout
- Integrations with third-party systems, ensuring compliance with enterprise data models

Full-Stack Developer – Private Management Tool **Aug 2025**

Freelance Project – Lebanon

- Developed a Flutter Web + Firebase full-stack platform with Odds API integration, real-time data pipelines, and advanced risk analysis dashboards. Delivered secure authentication (JWT, Firestore rules) and deployed on Firebase Hosting with CI/CD for scalability and low latency

Software Engineer – Service Information System (SAP Integration) **Jun 2025**

INTELS Integrated Logistic Services – Nigeria

- Engineered a Service Information System with SAP ERP integration to manage machine documentation, spare parts, and maintenance workflows
- Implemented real-time SAP data synchronization using middleware services to ensure master data integrity
- Designed modules for spare parts queries, requisition approvals, and accessory lifecycle tracking
- Enhanced maintenance management processes by reducing downtime through automated data access and digitalized manual

Software Engineer – Quotation Management System **Feb 2025**

ESAB (Multinational Welding & Cutting Solutions Company) – United Arab Emirates

- Automated quotation & contract document generation (PDF/Word) with templating libraries, reducing manual effort
- Streamlined sales operations by introducing process automation and database-driven workflows, cutting cycle times significantly

Full Stack Developer – Mobile Application **Mar 2024 – Jun 2024**

Freelance Project - Lebanon

- Designed and developed a vacation budgeting mobile app using Flutter and Dart
- Built and integrated a custom Artificial Intelligence neural networks system for travel destination suggestions
- Managed backend development, UI/UX design, and database integration
- Implemented group budgeting and expense tracking features

Web Mastering Internship **Jan 2024 – Aug 2024**

Notre Dame University - Lebanon

- Maintained and updated university websites, ensuring smooth server operations
- Supported the design and layout of web pages using HTML, CSS, and JavaScript
- Implemented basic security practices and contributed to data integrity management

Team Leader at Anthony's Diner | Zouk Mosbeh **Sep 2022 – Dec 2024**

- Supervised a team of 12 staff to ensure high-quality customer service
- Managed tasks including scheduling, inventory management, coordinating with kitchen staff
